

Acronis Files Cloud

The Secure Sync and Share Solution
Designed Exclusively for Service Providers

Meet the Mobility and BYOD Needs of Customers

Designed exclusively for service providers, Acronis Files Cloud provides users with sync and share capabilities in an easy, complete, and secure cloud solution. Easy to sell and deploy, Acronis Files Cloud lets you expand your product portfolio, brand it as your own service, reduce customer churn, and quickly realize incremental revenues.

Using Acronis Files Cloud, your customers can work with the content they need, no matter where they are, no matter what device they use — smartphone, tablet, laptop, PC, or Mac®. With Acronis Files Cloud, your customers can improve employee productivity, enhance customer service, attract new customers, and grow revenues.

Why Choose Acronis Files Cloud?

Are you looking to offer your customers a solution they need? One that you can easily deploy, is ready to sell, and quick to launch? Are you looking to expand your product portfolio by delivering the best, most secure file sync and share solution?

Acronis Files Cloud is the product you need. It is a file sync, and share (FSS) solution that is specifically designed to help service providers to meet the needs of their customers, while providing the data security

and privacy they demand. With no up-front investment, you can quickly setup Acronis Files Cloud, brand it as your own service, and offer an easy, complete and safe FSS service to your customers.

Quick to Deploy

With the Acronis-hosted model, service providers can activate Acronis Files Cloud in just few clicks without any investments in hardware.

Easy to Use

By providing end users with an intuitive interface, Acronis Files Cloud ensures a quick start and eliminates the need for customer training.

Easy to Sell, Upsell or Bundle

Acronis Files Cloud allows service providers to expand their product portfolio with service that is in demand, increasing customer retention and generating new revenue streams.

Secure Sync and Share

Acronis Files Cloud provides customers with the industry's strongest security tools, including flexible controls to manage data users and applications, and over-the-air and on-device FIPS 140-2 certified encryption.

Convenient Pay-as-You-Go Pricing

Depending on the business need, it is possible to easily scale up or down based on the number of subscribers, and pay only for the service that is actually used.

PART OF ACRONIS DATA CLOUD:

Acronis Files Cloud is a part of powerful Acronis Data Cloud platform, which allows service providers to have one solution that delivers backup, disaster recovery, file sync & share and notarization services for their customers.

With ready to sell and quick to deploy Acronis Files Cloud, service providers can develop strong relationships with customers and get quick revenues with minimum upfront investment.

5 Benefits Your Customers Can Get Using Acronis Files Cloud

1. Transform team's mobile devices, including BYOD, into a secure and comprehensive collaboration platform.
2. Respond faster to critical business events and customer inquiries, improving customer service.
3. Increase productivity and collaboration by enabling employees to easily share data and files with colleagues, customers, and partners.
4. Know where business data is at all times with a complete audit trail of what end users are doing.
5. Enjoy peace of mind knowing that data is stored in a secure cloud infrastructure.
